

AVINASH BOLLIGARLA

Data Analyst

+1 (737) 381-9243 • avinashbolligarla1606@gmail.com • [linkedin.com/in/avinash-bolligarla](https://www.linkedin.com/in/avinash-bolligarla)

PROFESSIONAL SUMMARY

Results-driven Data Analyst with a strong foundation in computer science and IT management. Experienced in Python, SQL, and data visualization tools. Published researcher with a Best Paper Award in AI/ML at ICDSA 2023. Adept at translating complex data into actionable insights to support business decision-making. Seeking a Data Analyst role where I can apply technical expertise and analytical thinking to drive organizational impact.

EDUCATION

Master of Science - Information Technology Management | **Webster University**, St. Louis, MO | GPA: 3.5/4.0 - June 2026

Bachelor of Technology - Computer Science & Engineering | **Vel Tech University**, India | GPA: 8.1/10 - April 2024

TECHNICAL SKILLS

Data & Analytics: SQL, Python (Pandas, NumPy, Matplotlib), Excel (Pivot Tables, VLOOKUP), Power BI, Tableau

Programming: Python, JavaScript, Java, C/C++, Node.js, React.js

Databases: SQL, MongoDB, Database Management Systems

Networking & Security: CCNA (Cisco Certified), Cisco Cybersecurity Essentials, OSPF, EIGRP, VLANs, VPNs, Firewalls

Other Tools: IoT (Arduino, LoRaWAN, GIS), Linux, Agile/Scrum, Microsoft Office Suite

WORK EXPERIENCE

Company 1:

Data Analyst Intern

Duration:

- Assisted in analyzing healthcare datasets by writing SQL queries and performing basic data cleaning and transformation.
- Supported senior analysts in building dashboards (Power BI/Tableau) to track key metrics such as patient visits and claim status.
- Performed data validation and quality checks to identify missing or inconsistent records in medical datasets.
- Generated ad hoc reports for internal teams and documented data definitions, queries, and reporting logic.
- Collaborated with team members through JIRA/internal tools to track tasks, resolve data issues, and support ongoing projects.

Company 2:

Role:

Duration:

- Analyzed healthcare datasets (EHR/claims data) using SQL and Python to identify trends in patient admissions, readmissions, and treatment outcomes.
- Used internal reporting tools (e.g., Horizon/enterprise analytics platform) to extract, validate, and reconcile data across multiple systems.
- Built and maintained interactive dashboards in Power BI/Tableau to track KPIs such as patient volume, discharge rates, and treatment costs.
- Collaborated with cross-functional teams via JIRA/ticketing tools to gather requirements, troubleshoot data issues, and support reporting needs.
- Automated recurring reports and performed data validation checks, improving reporting accuracy and reducing manual effort.

PROJECTS

Project1

Brain Tumor Segmentation — AI/ML Research | Vel Tech University2023

- Developed a novel Gaussian-based U-Net deep learning architecture for accurate brain tumor segmentation from MRI images.
- Outperformed existing segmentation benchmarks using advanced image processing and deep learning techniques.
- Best Paper Award at ICDSA 2023 (Image Processing & Computer Vision track).Published research paper and received

CERTIFICATIONS
